*Basically, I am retired  
– BUT –  
Open to interesting projects to solve problems*

**Over 40 years of experience  
I make computer systems run great !!!  
Tell me your problems**

---

Basically, I am retired – BUT – I am always open to interesting projects. I have a passion of supporting Windows and Mainframe computer systems. I not only develop & support computer systems – BUT – I also streamline office procedures.

*I see problems everywhere I look.*

Most notable today are:

Microsoft Windows 10 released 4 years ago with an estimate of 700,000,000 users.

**– AND –**

AT&T / DirecTV NEW GUI Format released a year ago with DirecTV estimate of 25,000,000 users.

(Becoming less daily – DirecTV had 35 million users 5 years ago – How low can they go and still provide service ?!?)

You don't have either of these problems ?!?! Just call and ask me about them –  
Mind blowing !!!

I have tried to HELP these companies with their problems – BUT – They don't even acknowledge they have problems !!! You can't fix what you don't see. I like the saying, **“You don't know -- What you don't know”**

These problems are there for a reason !!! Young developers have not been trained properly (NO Transfer of Knowledge – I know, I have tried myself). They think (or don't THINK) they know everything right out of College (Actually, they know **nothing** and it shows).

I was a young developer over 40 years ago. I was trained differently. Not only do developers need to know the current application needs – BUT – What affect do these changes make on everything else (within a company and out).

It is like “Global Change” itself, it is not enough to “agree” or “disagree”.

Anyway, I expect that you have problems to solve. When all else fails, here I am, ready to do it (Old School – Can Do – Problem Solver). I am offering to meet for FREE to understand your specific needs. If you are not interested in my offerings – end of project at no cost.

I specialize in projects that other developers “Can't DO – OR – Don't DO” (One in the same) !!! Again, just ask. I have many examples that may fit your needs today.

I prefer projects in the Concord, NH area. I am totally immersed into my projects. I get the BEST out of ALL technologies.

My very BEST career position was 10 years as IT Director / Systems Analyst / Programmer for the Concord School District (Until budget cuts – Oh, well).
